

# Weft Hair

Our packet of Bondi Hair Tape In Hair Extension contains 20 weft pieces which equals to 10 sandwiches of slim tape hair. This usually covers a half head and weights between 50 -75g of hair depending on the length you have chosen.

## What is the difference between Ceramic or Titanium?

Titanium is better at holding heat compared to Ceramic. Hence, we recommend to use titanium irons on thicker, coarser hair types, as you will get better results.
