

EPIC EXPERIENCES - ENDLESS
ENTERTAINMENT

About

We create engaging idle games that provide endless entertainment for our players. With a focus on delivering simple yet satisfying game play, our mission is to bring enjoyment to players around the world.

Embed Playsaurus Web Games On Your Site

Why Embed our HTML5 Games?

[Playsaurus](#) is known for developing exceptional web games that consistently rank within the top 1% in terms of user engagement and time spent in game.

As a company with roots in browser-based gaming, we possess a deep understanding of the web audience and their expectations from a web-based gaming experience. Consequently, our games frequently secure leading positions on numerous platforms, often ranking among the top three most played titles on major web gaming portals.

Games

Clicker Heroes

Kill monsters, collect gold, upgrade heroes, use skills, find treasures, kill bosses, and explore new worlds in this epic adventure!.

Mr. Mine

Manage a team of miners and upgrade your drill to idle your way through the mines and discover mysteries and treasures in the depths below.

POKER ♠ QUEST

The game offers a wide variety of playable heroes, each specializing in different strategies that change the way you play

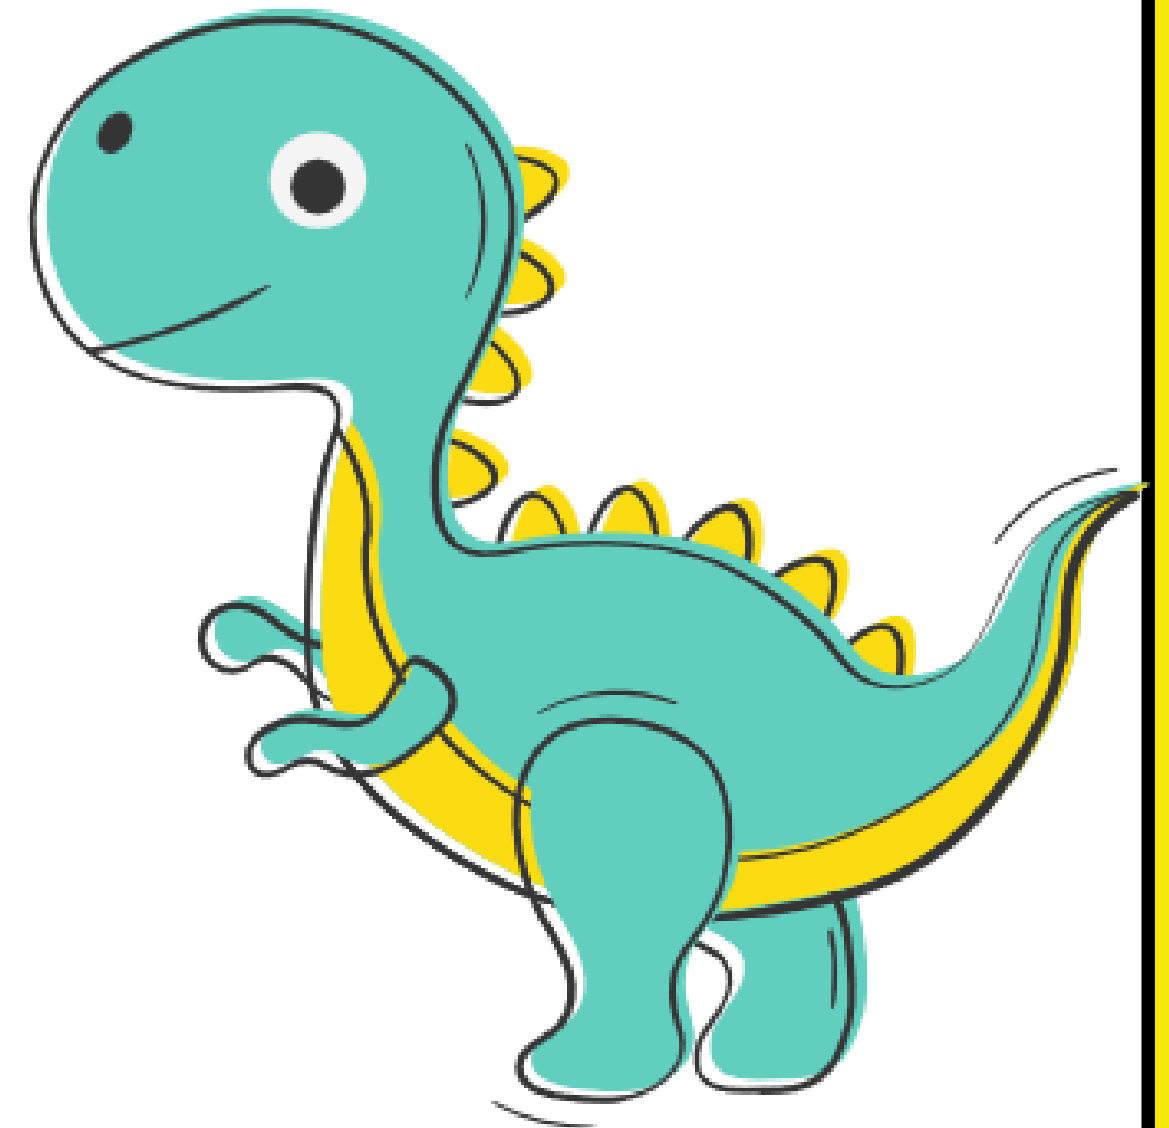

Fray Fight

All roads end in Valhalla, but the legacy you build before reaching your doom is up to you. Pick your character and choose your build carefully while you survive waves of enemies and attempt to make it where no one has before.

What is Playsaurus Publishing?

Playsaurus Publishing is a game publishing solution designed to help small, indie developers navigate the incredibly competitive gaming industry.

Why publish with Playsaurus?

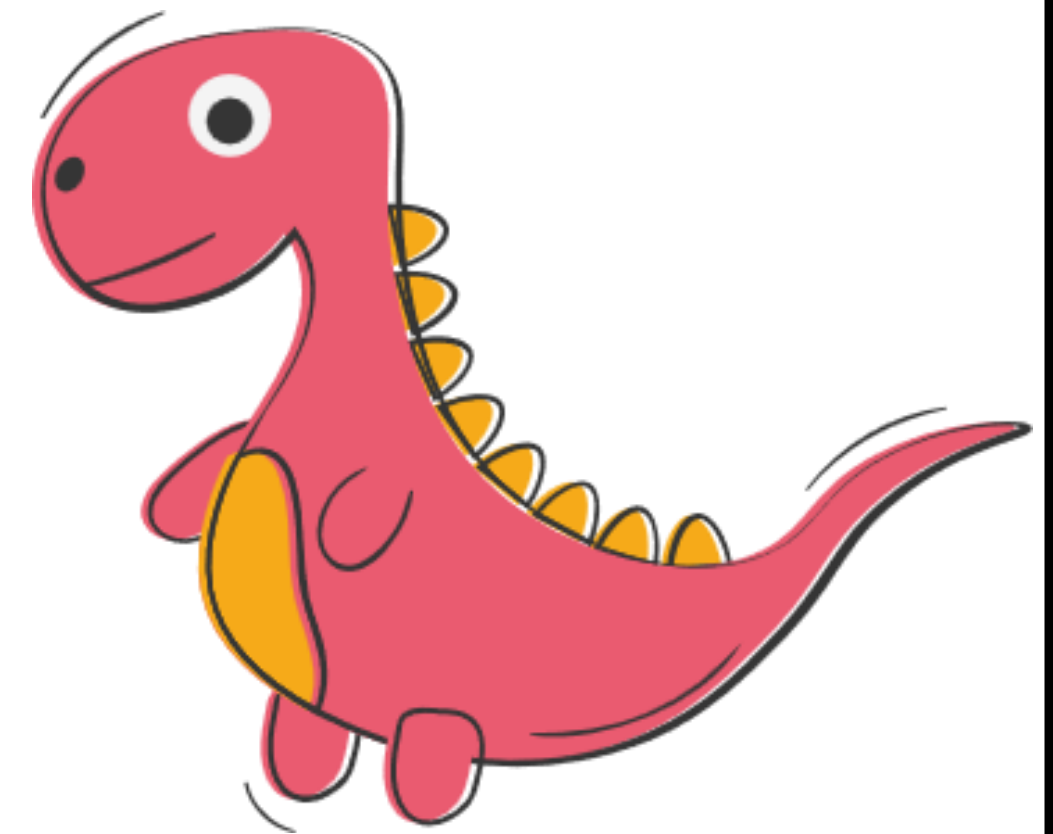

At Playsaurus, we don't care about fancy business plans—we want to invest in people.

We remain hands off during the whole process. While we are happy to provide feedback when asked, at the end of the day, your game is YOUR own vision. We don't get involved in the design or development of games.

By publishing with Playsaurus, you'll receive help with:

- Determining when and where to launch for maximum reach
- Taking advantage of the current indie games landscape
- Leveraging game portal/platform algorithms to get the best possible features
- Understanding how to best localize your game and in which languages
- Advertising to ensure maximum return on ad spend
- Leveraging A/B testing the right way to make iterative improvements at scale
- Running a successful pre-launch wish list campaign
- Top-notch press releases
- Influencer marketing (Twitch and YouTube)
- Legal concerns, mark, and rights registration
- Legal help with IP defense (if needed)
