Features of BEP20 Token Development

- Exchange listings
- Dual-chain architecture
- Supports POS and DPOS
- Blacklist Tokens

- Quick in Transactions and more

Benefits of BEP20 Token Development

- It is highly scalable and independent which means even if Binance Chain stops operating, BSC will continue to function.
- The transaction process done in Binance smart chain is much faster compared to other blockchain networks.
- Anyone can easily build, and deploy smart contracts & tokens without difficulties in BSC.
- BEP20 tokens provide clients with an unmistakable perspective on what occurs with the tokens and who possesses them. Everybody can perceive how the tokens are utilized.
- Unlike popular blockchains like Ethereum, Binance Smart Chain doesn't cost a huge amount of cash to make new coins. Clients can make new coins on the BSC without burning through a lot of cash.
